

Certificate of Merit

AWARDED TO

Jay Cochran

FOR THE SUCCESSFUL
COMPLETION OF

Variable Speed Outdoor Product Technical

COURSE DESCRIPTION

This course is designed to teach dealers and technicians proper application, installation, and troubleshooting for Trane and American Standard variable speed outdoor products. This will include system design duct design considerations for indoor airflow that can vary from 30% to 100%. The course covers how to use the on board electronics to set up and troubleshoot this new product. The course will also address specific WIFI enable comfort controls that must be applied as a component of the system.

Course Length: 8 Hours NATE # 1010-0066

ON **July 2, 2014**
